

Machine Learning & NLP Specialist

Cognitive AI Systems • New York, NY (Hybrid) • 3+ Years Experience Required

About the Position:

We are looking for a passionate Machine Learning & NLP Specialist to design and deploy transformer models and embedding retrieval systems into high-throughput production services.

Key Responsibilities:

- Train, evaluate, and fine-tune large language models and semantic embedding algorithms.
- Build low-latency inference APIs with Python and FastAPI containerized in Docker.
- Design vector retrieval pipelines and evaluate candidate matching models.
- Collaborate with data engineers on feature store maintenance and data preprocessing.

Mandatory Required Skills:

Python, PyTorch, Scikit-learn, Machine Learning, NLP, FastAPI

Preferred / Bonus Qualifications:

Docker, Pandas, NumPy, AWS, HuggingFace, Vector Search

Education Requirements:

Master's or Bachelor's Degree in Computer Science, AI, or Data Science
